Learner diversity

In the past year, Cambridge International's candidates came from **156 countries**:

How can we meet the different needs of each country, school, class and individual?

LANGUAGE AWARENESS

Supporting the self-development of highly diverse individuals in highly diverse contexts

Accommodating linguistic diversity among all our individual learners

Recognising differences among first language users as well as those for whom English is not their first language

LANGUAGE AWARENESS

Supporting the self-development of highly diverse individuals in highly diverse contexts

'Miami English' and the Linguistic Oddness of South Florida

South Beach speech is like no other.

BY DAN NISGOWITZ APRIL 04, 2017

Welcome to Miami Beach, Florida.

FLORIDA IS WEIRD.

That much probably goes without saying: In its flora and fauna, its cultural history, its politics, its singularly bizarre criminal elements, and its natural ecosystems, there is nowhere else like it. So it should come as no surprise that, though it theoretically is part of the American South, pretty much any discussion of Southern linguistics comes with a caveat: "Well, except South Florida."

South Floridians do not have the pin-pen merger, which makes the word "ten" sound like "tin." They do not "front their O," which turns a word like "boat" into "bch-oh-t." They do not turn simple words into complex ones, like "friend" into "free-ay-nd" (this is also known as a Southern drawl). These are standards throughout the American South, and they are almost completely absent from South Florida.

So, well, what do South Floridians sound like? And how did this weirdness happen?

Enjoying this story?

South Florida is not any one thing—how could it be, with a mix of Cubans, whites, Haitians, Colombians, Jews, Nicaraguans, Jamaicans, Bahamians, Barbadians, Puerto Ricans, and about a dozen others—but it's actually always been like that.

If only 70% of English students 'pass' English Language at GCSE, how does this affect access to other subjects for the other 30%?

Issues in your context?

Can learners with
diverse linguistic skills/
backgrounds be
assessed fairly and
equally?

To what extent, if at all,
is language skill a
relevant part of the
construct being
assessed (e.g. in
Maths, History etc)?

Basic comprehension

To what extent are different cultural values and expectations transmitted and learned through subconscious, embedded linguistic processes?

(e.g. How are kinship terms used in your students' L1 and L2?)

How might this fundamentally affect access to learning?

(e.g. questions about personal relationships involving implicit values)

Cultural values and expectations

Conceptual metaphor

Which deep-lying psychological modalities are embedded in fundamental linguistic categories?

(e.g. how are concepts of space and time embedded in verb systems?)

How might this fundamentally affect access to learning?

(e.g. how to word science questions to avoid ambiguities?)

Issues in your context?

What are the
benefits of
language
development?

**Discussion
Point 2**

Self

Educational

Studies have shown significant correlations between
L1 language ability and...

Conceptual
understanding

Emotional
development

Numeracy

Social
development

Spatiotemporal
reasoning

Language development and 'non-language' subjects

"An average language proficiency level of B2 on the Common European Framework of References for Languages (CEFR) is useful to access typical IGCSE exams, and CEFR level of C1 could provide an added advantage of linguistic resources to be able to develop arguments needed for higher grades for Humanities subjects such as History and Geography."

Shaw and Imam, 'Assessment of International Students Through the Medium of English: Ensuring Validity and Fairness in Content-Based Examinations' (2013)

Language Barriers in Education

Discussion Point 3

*Language
barriers*

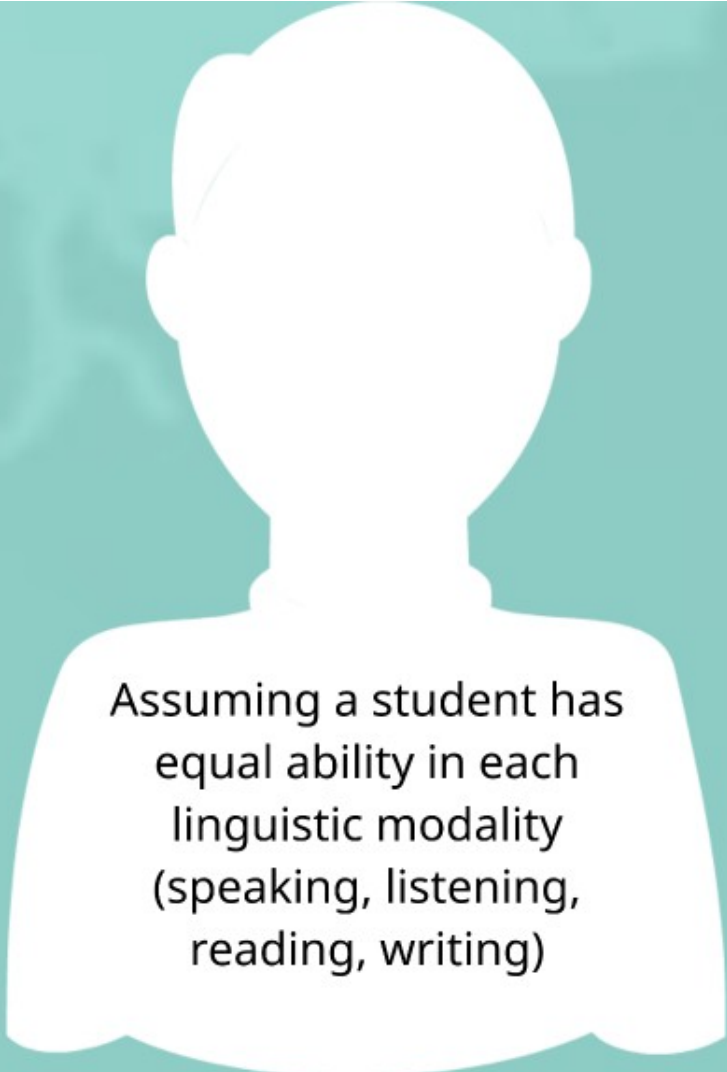

*Language
awareness
in the
classroom*

*Language
awareness in
assessment*

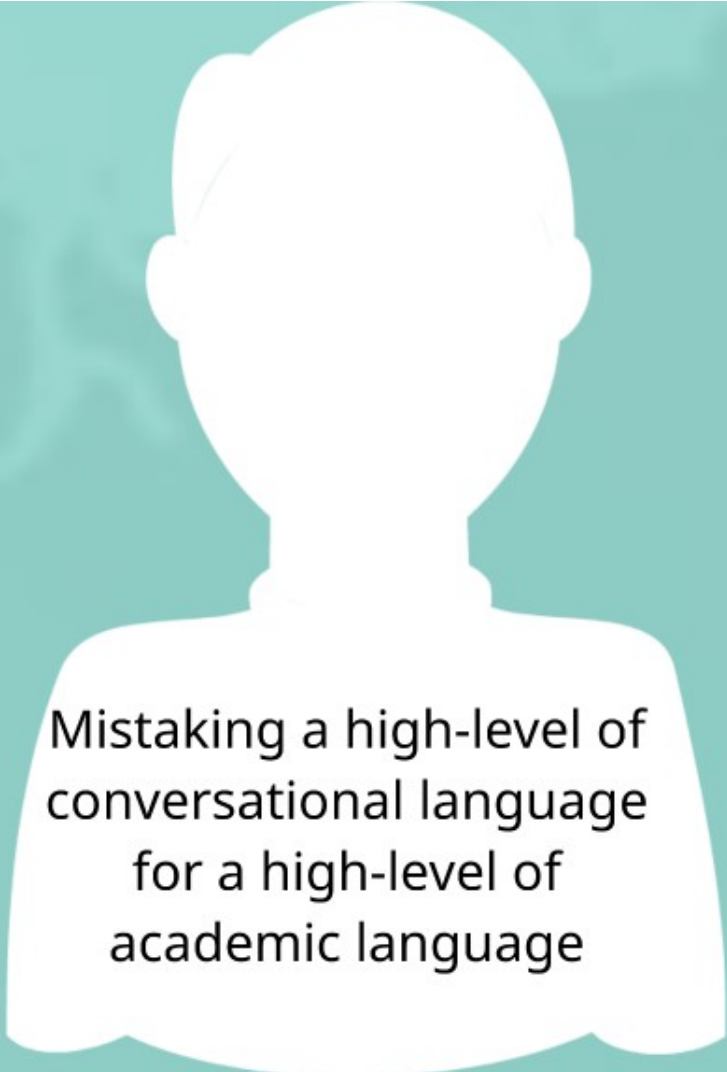

How might a 'language unaware' teacher unknowingly create barriers to learning?

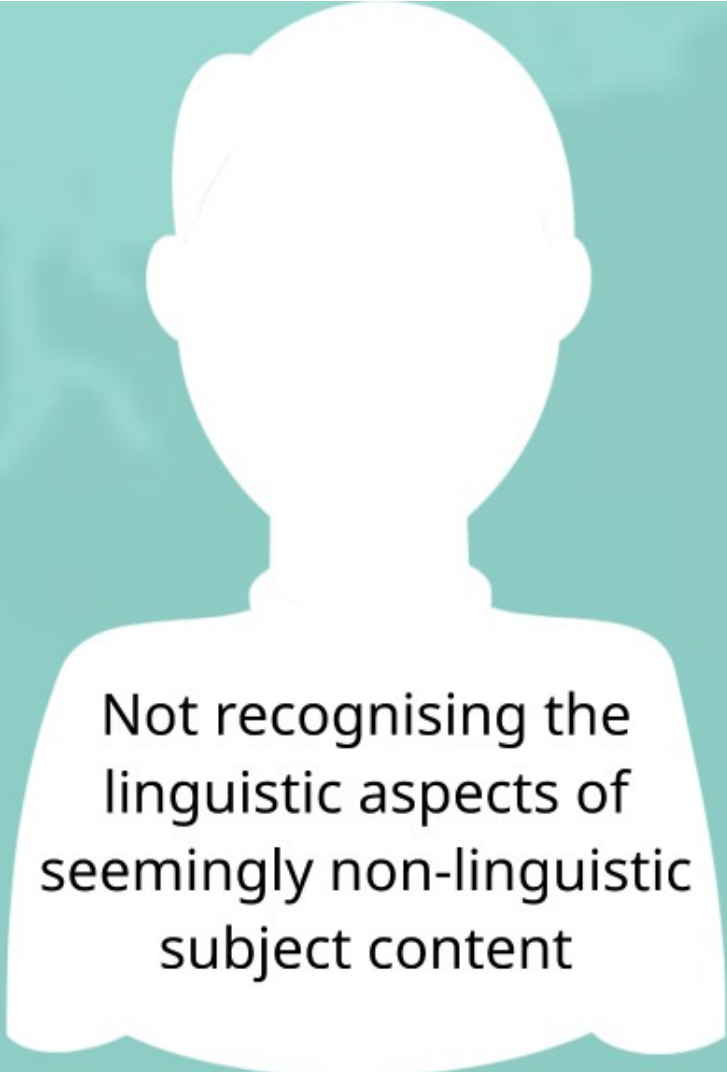

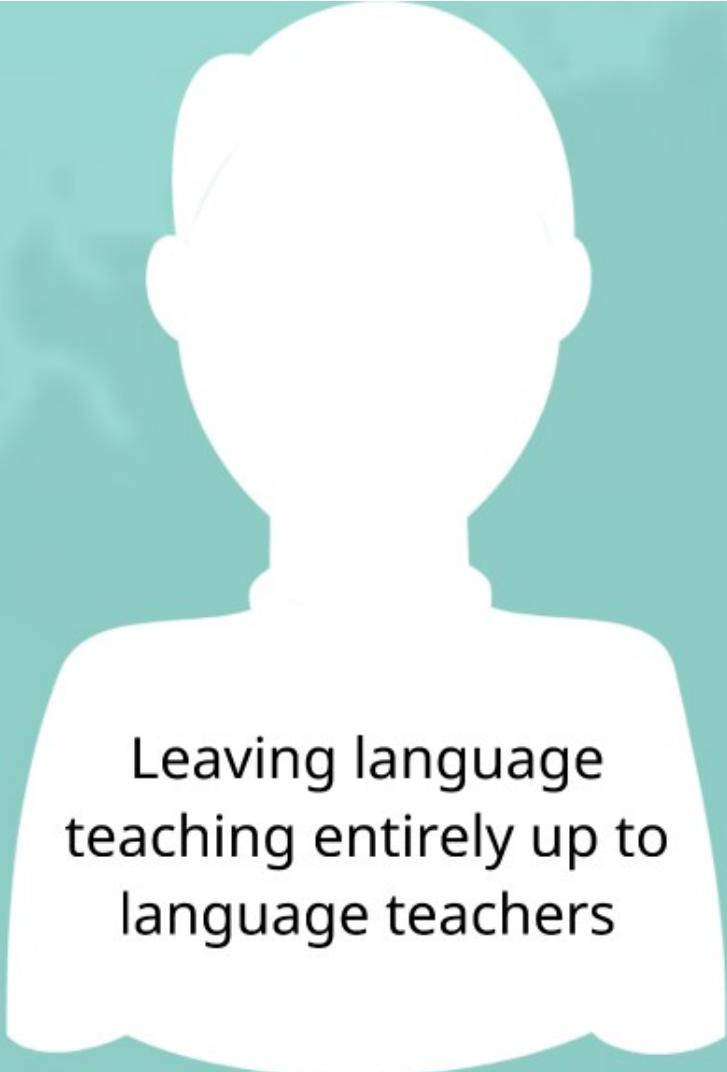

Assuming a student has
equal ability in each
linguistic modality
(speaking, listening,
reading, writing)

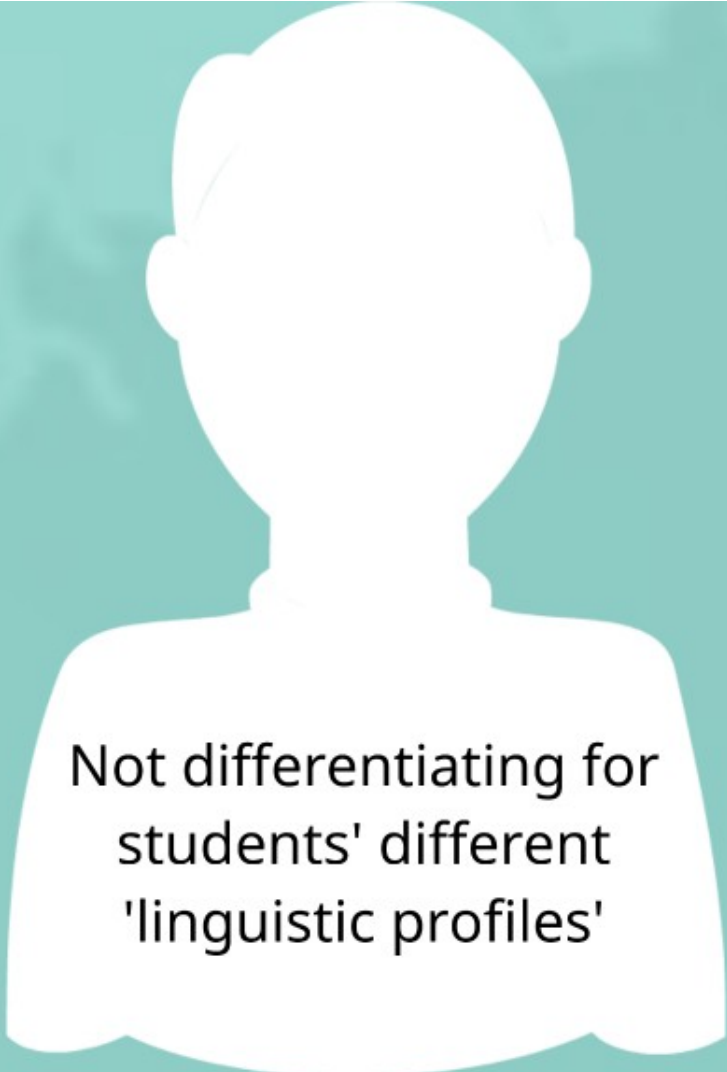

Mistaking a high-level of
conversational language
for a high-level of
academic language

Not recognising the
linguistic aspects of
seemingly non-linguistic
subject content

Leaving language
teaching entirely up to
language teachers

Not differentiating for
students' different
'linguistic profiles'

Language strategies

- Only use technical vocabulary where it is needed
- Avoid starting sentences with dependent clauses
- Use standard command words
- Remove unnecessary words
- Separate question from information
- Use short sentences
- Avoid idioms
- Prefer subject-verb-object convention
- Use verbs rather than related abstract nouns
- Avoid the passive voice
- Avoid phrasal verbs
- Clarify meaning and reference of pronouns
- Avoid asking more than one question in a single sentence
- Avoid words with multiple meanings
- Avoid jargon or noun strings
- Avoid negatives
- Avoid traditional 'textbook' or 'exam' language
- Avoid colloquialisms
- Avoid metaphors

When Pip was confronted by Magwitch, why did he feel like a fish out of water, and how does this play out in the denouement of the novel?

Two lifts depart the fourth floor of an eight storey block of flats at the same time, one going to the top floor at 19mph and the other going to the bottom floor at 21mph, but which arrives at its ultimate destination first?

Outline the Red Army's strategy at the Battle of Stalingrad.

Language Awareness in Teaching

ISBN: 9781107618282
Format: Paperback
Subject(s): Teaching Practice and Professional Development
Author(s): Timothy Chadwick
Available from: April 2012

In collaboration with Cambridge Assessment International Education, the Cambridge Teacher series offers practical guidance and innovative teaching approaches to those looking to develop their classroom practice. Underpinned by the latest research, the books provide a valuable resource for teachers who want to deepen their understanding of key theoretical ideas with a view to putting these into practice in their classrooms. The series benefits from a wealth of international experience and informs a clear understanding of the challenges that face teachers in the 21st century.
