## Mapping U.S. Common Core State Standards for Mathematics to Cambridge IGCSE ${ }^{\circledR}$ Mathematics (US) 0444 and Cambridge IGCSE ${ }^{\circledR}$ Additional Mathematics (US) 0459

Cambridge International Examinations has mapped the Common Core State Standards (CCSS) for Mathematics to the syllabuses for Cambridge IGCSE Mathematics (US) 0444 and Cambridge IGCSE Additional Mathematics (US) 0459.

There are two levels of achievement in Cambridge IGCSE Mathematics (US) 0444, via two separate routes: core and extended. In this document we have differentiated between what is covered in the core and what is covered in the extended curriculum content.

This document shows where the standards are covered in each syllabus and references are made to the curriculum content on pages 8 to 35 of the 0444 syllabus, and on pages 7 to 17 of the 0459 syllabus. Grayed out cells indicate where the standards are not covered.

A small number of standards are not explicit in the syllabi as they do not form part of the assessment. However, these standards are covered in the schemes of work that we provide to accompany the syllabi so that they can be incorporated into the teaching program.

| Extend the properties of exponents to rational exponents |  |  |  |  |  |  |
| N-RN1 | 1. Explain how the definition of the meaning of rational exponents follows from extending the properties of integer exponents to those values, allowing for a notation for radicals in terms of rational exponents. For example, we define $5^{1 / 3}$ to be the cube root of 5 because we want $\left(5^{1 / 3}\right)^{3}=5\left({ }^{1 / 3}\right)^{3}$ to hold, so $\left(5^{1 / 3}\right)^{3}$ must equal 5 . | Number C1.7 | Number E1.7 | Unit 1 <br> (Core and Extended) | Number 1.9 | Unit 1 <br> Subsection A |
| N-RN2 | 2. Rewrite expressions involving radicals and rational exponents using the properties of exponents. | Number C1.7 <br> Algebra C2.4 | Number E1.7 <br> Algebra E2.4 | Unit 1 <br> (Core and Extended) | Number 1.9 | Unit 1 <br> Subsection A |
| Use properties of rational and irrational numbers |  |  |  |  |  |  |
| N-RN3 | 3. Explain why the sum or product of two rational numbers is rational; that the sum of a rational number and an irrational number is irrational; and that the product of a nonzero rational number and an irrational number is irrational. |  | Number E1.1 | Unit 1 <br> (Extended) |  |  |

| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Perform arithmetic operations with complex numbers |  |  |  |  |  |  |
| N-CN1 | 1. Know there is a complex number $i$ such that $i^{2}=-1$, and every complex number has the form $a+b i$ with $a$ and $b$ real. |  |  |  | Number 1.1 | Unit 1 <br> Subsection B |
| N-CN2 | 2. Use the relation $i^{2}=-1$ and the commutative, associative, and distributive properties to add, subtract, and multiply complex numbers. |  |  |  | Number 1.2 | Unit 1 <br> Subsection B |
| N-CN3 | 3. (+) Find the conjugate of a complex number; use conjugates to find moduli and quotients of complex numbers. |  |  |  | Number 1.3 | Unit 1 <br> Subsection B |
| Represent complex numbers and their operations on the complex plane |  |  |  |  |  |  |
| N-CN4 | 4. (+) Represent complex numbers on the complex plane in rectangular and polar form (including real and imaginary numbers), and explain why the rectangular and polar forms of a given complex number represent the same number. |  |  |  | Number 1.4 | Unit 1 <br> Subsection B |
| N-CN5 | 5. (+) Represent addition, subtraction, multiplication, and conjugation of complex numbers geometrically on the complex plane; use properties of this representation for computation. For example, $(-1+\sqrt{ } 3 i)^{3}=8$ because $(-1+\sqrt{ } 3 i)$ has modulus 2 and argument $120^{\circ}$. |  |  |  | Number 1.5 | Unit 1 <br> Subsection B |
| N-CN6 | 6. (+) Calculate the distance between numbers in the complex plane as the modulus of the difference, and the midpoint of a segment as the average of the numbers at its endpoints. |  |  |  | Number 1.6 | Unit 1 <br> Subsection B |

| Perform operations on vectors |  |  |  |  |  |  |
| N-VM4 | 4. (+) Add and subtract vectors. <br> a. Add vectors end-to-end, component-wise, and by the parallelogram rule. Understand that the magnitude of a sum of two vectors is typically not the sum of the magnitudes. b. Given two vectors in magnitude and direction form, determine the magnitude and direction of their sum. <br> c. Understand vector subtraction $\mathbf{v}-\mathbf{w}$ as $\mathbf{v}+(-\mathbf{w})$, where $-\mathbf{w}$ is the additive inverse of $\mathbf{w}$, with the same magnitude as $\mathbf{w}$ and pointing in the opposite direction. Represent vector subtraction graphically by connecting the tips in the appropriate order, and perform vector subtraction component-wise. |  | Transformations and vectors E5.3 and E5.4 | Unit 5 <br> (Extended) | Transformations and vectors 5.1 and 5.3 | Unit 5 |
| N-VM5 | 5. (+) Multiply a vector by a scalar. <br> a. Represent scalar multiplication graphically by scaling vectors and possibly reversing their direction; perform scalar multiplication component-wise, e.g., as $c\left(\mathbf{v}_{\mathrm{x}}, \mathbf{v}_{\mathrm{y}}\right)=\left(\mathrm{cv}_{\mathrm{x}}, \mathrm{c} \mathbf{v}_{\mathrm{y}}\right)$. b. Compute the magnitude of a scalar multiple cv using $\\|\mathrm{cv}\\|=\|\mathrm{c}\| \mathbf{v}$. Compute the direction of cv knowing that when $\|c\| \mathbf{v} \neq 0$, the direction of cv is either along $\mathbf{v}$ (for $\mathrm{c}>0$ ) or against $\mathbf{v}$ (for $\mathrm{c}<0$ ). |  | Transformations and vectors E5.3 and E5.5 | Unit 5 <br> (Extended) | Transformations and vectors 5.1 and 5.3 | Unit 5 |

| Common Core State Standards - Vector and Matrix Quantities |  | 0444 Core curriculum content | 0444 Extended curriculum content | 0444 <br> Scheme of work | $\qquad$ | $0459$ <br> Scheme of work |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Perform operations on matrices and use matrices in applications |  |  |  |  |  |  |
| N-VM6 | 6. (+) Use matrices to represent and manipulate data, e.g., to represent payoffs or incidence relationships in a network. |  |  |  | Number 1.10 | Unit 1 <br> Subsection C |
| N-VM7 | 7. (+) Multiply matrices by scalars to produce new matrices, e.g., as when all of the payoffs in a game are doubled. |  |  |  | Number 1.12 | Unit 1 <br> Subsection C |
| V-Vm8 | 8. (+) Add, subtract, and multiply matrices of appropriate dimensions. |  |  |  | Number 1.11 | Unit 1 <br> Subsection C |
| N-VM9 | 9. (+) Understand that, unlike multiplication of numbers, matrix multiplication for square matrices is not a commutative operation, but still satisfies the associative and distributive properties. |  |  |  | Number 1.11 | Unit 1 <br> Subsection C |
| N-VM10 | 10. (+) Understand that the zero and identity matrices play a role in matrix addition and multiplication similar to the role of 0 and 1 in the real numbers. The determinant of a square matrix is nonzero if and only if the matrix has a multiplicative inverse. |  |  |  | Number 1.13 and 1.14 | Unit 1 <br> Subsection C |
| N-VM11 | 11. (+) Multiply a vector (regarded as a matrix with one column) by a matrix of suitable dimensions to produce another vector. Work with matrices as transformations of vectors. |  |  |  | Number 1.11 | Unit 1 <br> Subsection C |
| N-VM12 | 12. (+) Work with $2 \times 2$ matrices as transformations of the plane, and interpret the absolute value of the determinant in terms of area. |  |  |  | Number 1.15 | Unit 1 <br> Subsection C |

| Common Core State Standards - Seeing Structure in Expressions |  | 0444 Core curriculum content | 0444 Extended curriculum content | $0444$ <br> Scheme of work | $\begin{aligned} & 0459 \\ & \text { Curriculum } \\ & \text { content } \end{aligned}$ | 0459 <br> Scheme of work |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Interpret the structure of expressions |  |  |  |  |  |  |
| A-SSE1 | 1. Interpret expressions that represent a quantity in terms of its context. <br> a. Interpret parts of an expression, such as terms, factors, and coefficients. <br> b. Interpret complicated expressions by viewing one or more of their parts as a single entity. For example, interpret $P(1+r)^{n}$ as the product of $P$ and a factor not depending on $P$. | Algebra C2.7 | Algebra E2.7 | Unit 2 <br> (Core and Extended) |  |  |
| A-SSE2 | 2. Use the structure of an expression to identify ways to rewrite it. For example, see $x^{4}-y^{4}$ as $\left(x^{2}\right)^{2}-\left(y^{2}\right)^{2}$, thus recognizing it as a difference of squares that can be factored as $\left(x^{2}-y^{2}\right)\left(x^{2}+\right.$ $y^{2}$ ). | Algebra C2.9 | Algebra E2.9 | Unit 2 <br> (Core and Extended) |  |  |

Excellence in education

| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Write expressions in equivalent forms to solve problems |  |  |  |  |  |  |
| A-SSE3 | 3. Choose and produce an equivalent form of an expression to reveal and explain properties of the quantity represented by the expression.* <br> a. Factor a quadratic expression to reveal the zeros of the function it defines. <br> b. Complete the square in a quadratic expression to reveal the maximum or minimum value of the function it defines. <br> c. Use the properties of exponents to transform expressions for exponential functions. For example the expression $1.15^{t}$ can be rewritten as $\left(1.15^{1 / 12}\right)^{12 t} \approx 1.012^{12 t}$ to reveal the approximate equivalent monthly interest rate if the annual rate is $15 \%$. <br> * The Binomial Theorem can be proved by mathematical induction or by a combinatorial argument. |  | Algebra E2.4, E2.9 and E2.11 | Unit 2 <br> (Extended) |  |  |
| A-SSE4 | 4. Derive the formula for the sum of a finite geometric series (when the common ratio is not 1 ), and use the formula to solve problems. For example, calculate mortgage payments. | Algebra C2.13 | Algebra E2.13 | Unit 2 <br> (Core and Extended) |  |  |

| Common Core State Standards - Arithmetic with Polynomials and Rational Expressions |  | 0444 Core curriculum content | 0444 Extended curriculum content | $0444$ <br> Scheme of work | $\qquad$ | $0459$ <br> Scheme of work |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Perform arithmetic operations on polynomials |  |  |  |  |  |  |
| A-APR1 | 1. Understand that polynomials form a system analogous to the integers, namely, they are closed under the operations of addition, subtraction, and multiplication; add, subtract, and multiply polynomials. |  | Algebra E2.10 | Unit 2 <br> (Extended) | Algebra 2.4 | Unit 2 |
| Understand the relationship between zeros and factors of polynomials |  |  |  |  |  |  |
| A-APR2 | 2. Know and apply the Remainder Theorem: For a polynomial $p(x)$ and a number a, the remainder on division by $x-a$ is $p(a)$, so $p(a)=0$ if and only if $(x-a)$ is a factor of $p(x)$ |  |  |  | Algebra 2.1 | Unit 2 |
| A-APR3 | 3. Identify zeros of polynomials when suitable factorizations are available, and use the zeros to construct a rough graph of the function defined by the polynomial. |  |  |  | Algebra 2.2 | Unit 2 |
| Use polynomial identities to solve problems |  |  |  |  |  |  |
| A-APR4 | 4. Prove polynomial identities and use them to describe numerical relationships. For example, the polynomial identity $\left(x^{2}+y^{2}\right)^{2}=\left(x^{2}-y^{2}\right)^{2}+(2 x y)^{2}$ can be used to generate Pythagorean triples. |  |  |  | Algebra 2.3 | Unit 2 |
| A-APR5 | 5. (+) Know and apply the Binomial Theorem for the expansion of $(x+y)^{n}$ in powers of $x$ and $y$ for a positive integer $n$, where $x$ and $y$ are any numbers, with coefficients determined for example by Pascal's Triangle. |  | Algebra E2.8 | Unit 2 <br> (Extended) |  |  |

Excellence in education

| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Understand solving equations as a process of reasoning and explain the reasoning |  |  |  |  |  |  |
| A-REI1 | 1. Explain each step in solving a simple equation as following from the equality of numbers asserted at the previous step, starting from the assumption that the original equation has a solution. Construct a viable argument to justify a solution method. | Algebra C2.3 | Algebra E2.3 | Unit 2 <br> (Core and Extended) |  |  |
| A-REI2 | 2. Solve simple rational and radical equations in one variable, and give examples showing how extraneous solutions may arise. | Algebra C2.3 | Algebra E2.3 and E2. 12 | Unit 2 <br> (Core and Extended) |  |  |
| Solve equations and inequalities in one variable |  |  |  |  |  |  |
| A-REI3 | 3. Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters. | Algebra C2.3 | Algebra E2.1, E2.2 and E2.3 | Unit 2 <br> (Core and Extended) |  |  |
| A-REI4 | 4. Solve quadratic equations in one variable. <br> a. Use the method of completing the square to transform any quadratic equation in $x$ into an equation of the form $(x-p)^{2}=q$ that has the same solutions. Derive the quadratic formula from this form. <br> b. Solve quadratic equations by inspection (e.g., for $x^{2}=49$ ), taking square roots, completing the square, the quadratic formula and factoring, as appropriate to the initial form of the equation. Recognize when the quadratic formula gives complex solutions and write them as $a \pm b i$ for real numbers a and $b$. |  | Algebra E2.11 (not complex solutions) | Unit 2 <br> (Extended) | Number 1.7 | Unit 1 <br> Subsection B |

| Understand the concept of a function and use function notation |  |  |  |  |  |  |
| F-IF1 | 1. Understand that a function from one set (called the domain) to another set (called the range) assigns to each element of the domain exactly one element of the range. If $f$ is a function and $x$ is an element of its domain, then $f(x)$ denotes the output of $f$ corresponding to the input $x$. The graph of $f$ is the graph of the equation $y=f(x)$. | Functions C3.1 | Functions E3.1 | Unit 3 <br> (Core and Extended) | Functions 3.1 | Unit 3 <br> Subsection A |
| F-IF2 | 2. Use function notation, evaluate functions for inputs in their domains, and interpret statements that use function notation in terms of a context. | Functions C3.1 | Functions E3.1 | Unit 3 <br> (Core and Extended) | Functions 3.2 | Unit 3 <br> Subsection A |
| F-IF3 | 3. Recognize that sequences are functions, sometimes defined recursively, whose domain is a subset of the integers. For example, the Fibonacci sequence is defined recursively by $\mathrm{f}(0)=\mathrm{f}(1)=1, \mathrm{f}_{(n+1)}=\mathrm{f}_{(n)}+\mathrm{f}_{(n-1)}$ for $n \geq 1$. |  |  |  | Functions 3.10 | Unit 3 <br> Subsection B |

| Interpret functions that arise in applications in terms of the context |  |  |  |  |  |  |
| F-IF4 | 4. For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship. Key features include: intercepts; intervals where the function is increasing, decreasing, positive, or negative; relative maximums and minimums; symmetries; end behavior; and periodicity. | Functions C3.5 | Functions E3.5 | Unit 3 <br> (Core and Extended) | Functions 3.7 <br> Trigonometry 7.5 | Unit 3 <br> Subsection A <br> Unit 7 |
| F-IF5 | 5. Relate the domain of a function to its graph and, where applicable, to the quantitative relationship it describes. For example, if the function $\mathrm{h}(n)$ gives the number of person-hours it takes to assemble $n$ engines in a factory, then the positive integers would be an appropriate domain for the function. | Functions C3.6 | Functions E3.6 | Unit 3 <br> (Core and Extended) |  |  |
| F-IF6 | 6. Calculate and interpret the average rate of change of a function (presented symbolically or as a table) over a specified interval. Estimate the rate of change from a graph. |  | Functions E3.7 | Unit 3 <br> (Extended) |  |  |

## Mathematics: High School-Statistics and Probability

| Common Core State Standards - Interpreting Categorical and Quantitative Data |  | 0444 Core curriculum content | 0444 Extended curriculum content | 0444 <br> Scheme of work |  | $0459$ <br> Scheme of work |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Summarize, represent, and interpret data on a single count or measurement variable |  |  |  |  |  |  |
| S-ID1 | 1. Represent data with plots on the real number line (dot plots, histograms, and box plots). | Statistics C10.3 | Statistics E10.3, <br> E10.5 and E10.6 | Unit 10 (Core and Extended) |  |  |
| S-ID2 | 2. Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. |  | Statistics E10.7 | Unit 10 <br> (Extended) |  |  |
| S-ID3 | 3. Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). |  | Statistics E10.7 | Unit 10 <br> (Extended) | Statistics 9.3 | Unit 9 |
| S-ID4 | 4. Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. |  |  |  | Statistics 9.4 and 9.5 | Unit 9 |

| Summarize, represent, and interpret data on a single count or measurement variable |  |  |  |  |  |  |
| S-IC1 | 1. Understand statistics as a process for making inferences about population parameters based on a random sample from that population. |  |  |  | Statistics 9.1 | Unit 9 |
| S-IC2 | 2. Decide if a specified model is consistent with results from a given data-generating process, e.g., using simulation. For example, a model says a spinning coin falls heads up with probability 0.5 . Would a result of 5 tails in a row cause you to question the model? | Probability C9.2 and C9.3 | Probability E9.2 and E9.3 | Unit 9 <br> (Core and Extended) |  |  |
| Make inferences and justify conclusions from sample surveys, experiments, and observational studies |  |  |  |  |  |  |
| S-IC3 | 3. Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. |  |  |  | Statistics 9.1 | Unit 9 |
| S-IC4 | 4. Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. |  |  |  | Statistics 9.2 | Unit 9 |
| S-IC5 | 5. Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. |  |  |  | Statistics 9.2 | Unit 9 |
| S-IC6* | 6. Evaluate reports based on data. |  |  |  |  | Unit 9 |

* S-IC6 will not be assessed and should be taught via the scheme of work.

Excellence in education

| Common Core State Standards - Conditional Probability and the Rules of Probability |  | 0444 Core curriculum content | 0444 Extended curriculum content | 0444 <br> Scheme of work | $\begin{aligned} & 0459 \\ & \text { Curriculum } \\ & \text { content } \end{aligned}$ | 0459 <br> Scheme of work |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Understand independence and conditional probability and use them to interpret data |  |  |  |  |  |  |
| S-CP1 | 1. Describe events as subsets of a sample space (the set of outcomes) using characteristics (or categories) of the outcomes, or as unions, intersections, or complements of other events ("or," "and," "not"). | Probability C9.1 | Probability E9.1 | Unit 9 <br> (Core and Extended) |  |  |
| S-CP2 | 2. Understand that two events $A$ and $B$ are independent if the probability of $A$ and $B$ occurring together is the product of their probabilities, and use this characterization to determine if they are independent. | Probability C9.5 | Probability E9.4 and E9.5 | Unit 9 <br> (Core and Extended) |  |  |
| S-CP3 | 3. Understand the conditional probability of $A$ given $B$ as $P(A$ and $B) / P(B)$, and interpret independence of $A$ and $B$ as saying that the conditional probability of $A$ given $B$ is the same as the probability of $A$, and the conditional probability of $B$ given $A$ is the same as the probability of $B$. |  |  |  | Probability 8.1 | Unit 8 |
| S-CP4 | 4. Construct and interpret two-way frequency tables of data when two categories are associated with each object being classified. Use the two-way table as a sample space to decide if events are independent and to approximate conditional probabilities. For example, collect data from a random sample of students in your school on their favorite subject among math, science, and English. Estimate the probability that a randomly selected student from your school will favor science given that the student is in tenth grade. Do the same for other subjects and compare the results. |  |  |  | Statistics 9.7 | Unit 9 |

| Understand independence and conditional probability and use them to interpret data |  |  |  |  |  |  |
| S-CP5 | 5. Recognize and explain the concepts of conditional probability and independence in everyday language and everyday situations. For example, compare the chance of having lung cancer if you are a smoker with the chance of being a smoker if you have lung cancer. |  |  |  | Probability 8.1 | Unit 8 |
| Use the rules of probability to compute probabilities of compound events in a uniform probability model |  |  |  |  |  |  |
| S-CP6 | 6. Find the conditional probability of $A$ given $B$ as the fraction of $B$ 's outcomes that also belong to $A$, and interpret the answer in terms of the model. |  |  |  | Probability 8.1 | Unit 8 |
| S-CP7 | 7. Apply the Addition Rule, $P(A$ or $B)=P(A)+P(B)-P(A$ and $B$ ), and interpret the answer in terms of the model. |  | Probability E9.4 and E9.5 | Unit 9 <br> (Extended) |  |  |
| S-CP8 | 8. (+) Apply the general Multiplication Rule in a uniform probability model, $\mathrm{P}(A$ and $B)=\mathrm{P}(A) \mathrm{P}(B \mid A)=\mathrm{P}(B) \mathrm{P}(A \mid B)$, and interpret the answer in terms of the model. |  | Probability E9.4 and E9.5 | Unit 9 <br> (Extended) | Probability 8.2 | Unit 8 |
| S-CP9 | 9. (+) Use permutations and combinations to compute probabilities of compound events and solve problems. |  |  |  | Probability 8.3 | Unit 8 |

| Common Core State Standards - Using Probability to Make Decisions |  | 0444 Core curriculum content | 0444 Extended curriculum content | 0444 <br> Scheme of work | $\begin{gathered} 0459 \\ \text { Curriculum } \\ \text { content } \end{gathered}$ | 0459 <br> Scheme of work |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Calculate expected values and use them to solve problems |  |  |  |  |  |  |
| S-MD1 | 1. (+) Define a random variable for a quantity of interest by assigning a numerical value to each event in a sample space; graph the corresponding probability distribution using the same graphical displays as for data distributions. |  |  |  | Probability 8.4 | Unit 8 |
| S-MD2 | 2. (+) Calculate the expected value of a random variable; interpret it as the mean of the probability distribution. |  |  |  | Probability 8.4 | Unit 8 |
| S-MD3 | 3. (+) Develop a probability distribution for a random variable defined for a sample space in which theoretical probabilities can be calculated; find the expected value. For example, find the theoretical probability distribution for the number of correct answers obtained by guessing on all five questions of a multiple-choice test where each question has four choices, and find the expected grade under various grading schemes. |  |  |  | Probability 8.4 | Unit 8 |
| S-MD4 | 4. (+) Develop a probability distribution for a random variable defined for a sample space in which probabilities are assigned empirically; find the expected value. For example, find a current data distribution on the number of TV sets per household in the United States, and calculate the expected number of sets per household. How many TV sets would you expect to find in 100 randomly selected households? |  |  |  | Probability 8.5 | Unit 8 |

| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Use probability to evaluate outcomes of decisions |  |  |  |  |  |  |
| S-MD5 | 5. (+) Weigh the possible outcomes of a decision by assigning probabilities to payoff values and finding expected values. <br> a. Find the expected payoff for a game of chance. For example, find the expected winnings from a state lottery ticket or a game at a fast-food restaurant. <br> b. Evaluate and compare strategies on the basis of expected values. For example, compare a high-deductible versus a lowdeductible automobile insurance policy using various, but reasonable, chances of having a minor or a major accident. |  |  |  | Probability 8.4 and 8.5 | Unit 8 |
| S-MD6 | 6. (+) Use probabilities to make fair decisions (e.g., drawing by lots, using a random number generator). | Probability C9.1 | Probability E9.1 | Unit 9 (Core and Extended) |  |  |
| S-MD7 | 7. (+) Analyze decisions and strategies using probability concepts (e.g., product testing, medical testing, pulling a hockey goalie at the end of a game). |  |  |  | Probability 8.6 | Unit 8 |
