

SYLLABUS

**Cambridge International Level 3
Pre-U Certificate in
Global Perspectives (Short Course)**

1340

For examination in 2016, 2017 and 2018

QN: 600/3214/5

Cambridge Pre-U Syllabus

Support

Cambridge provides comprehensive support for all its qualifications, including the Cambridge Pre-U. There are resources for teachers and candidates written by experts. Cambridge also endorses a range of materials from other publishers to give a choice of approach. More information on what is available for this particular syllabus can be found at www.cie.org.uk

Syllabus updates

This syllabus is valid for examination in 2016, 2017 and 2018.

If there are any changes to this syllabus, Cambridge will write to Centres to inform them. Alterations to the first edition of this syllabus are marked by black vertical lines either side of the text. This syllabus will also be published annually on the Cambridge website (www.cie.org.uk/cambridgepreu). The version of the syllabus on the website should always be considered as the definitive version.

Further copies of this, or any other Cambridge Pre-U syllabus, can be obtained by either downloading from our website www.cie.org.uk/cambridgepreu

or contacting:

Customer Services, Cambridge International Examinations,

1 Hills Road, Cambridge CB1 2EU

Telephone: +44 (0)1223 553554

Fax: +44 (0)1223 553558

E-mail: info@cie.org.uk

Cambridge International Examinations retains the copyright on all its publications. Registered Centres are permitted to copy material from this booklet for their own internal use. However, we cannot give permission to Centres to photocopy any material that is acknowledged to a third party even for internal use within a Centre.

Introduction

Cambridge Pre-U qualifications aim to equip candidates with the skills required to make a success of their subsequent studies at university, involving not only a solid grounding in each specialist subject at an appropriate level, but also the ability to undertake independent and self-directed learning and to think laterally, critically and creatively.

The Cambridge Pre-U curriculum is underpinned by a core set of educational principles:

- A programme of study which supports the development of well-informed, open and independent-minded individuals capable of applying their skills to meet the demands of the world as they will find it and over which they may have influence.
- A curriculum which retains the integrity of subject specialisms and which can be efficiently, effectively and reliably assessed, graded and reported to meet the needs of universities.
- A curriculum which is designed to recognise a wide range of individual talents, interests and abilities and which provides the depth and rigour required for a university degree course.
- A curriculum which encourages the acquisition of specific skills and abilities, in particular the skills of problem solving, creativity, thinking critically, team working and effective communication.
- The encouragement of 'deep understanding' in learning – where that deep understanding is likely to involve higher order cognitive activities.
- The development of a perspective which equips young people to understand a range of different cultures and ideas and to respond successfully to the opportunity for international mobility.

In addition to the aims that run through and inform the Cambridge Pre-U subject syllabuses, Cambridge Pre-U Global Perspectives and Independent Research Report seek to add value in terms of coherence, depth and breadth, through:

- Expanding creative, critical and responsible awareness through the tackling of global issues in Global Perspectives.
- Encouraging focused personal exploration and increased depth of study through the Independent Research Report.

Global Perspectives places academic specialisation in a practical, real-world context, being a seminar-based opportunity to research and explore a range of issues challenging people across the globe. Developing critical/analytical, research, and problem-solving skills essential to higher education, candidates will learn to place their personal perspectives in a global context, finding new inspiration and challenges for their studies. Candidates will submit a presentation and an essay from their portfolio and sit an examination.

Cambridge Pre-U Global Perspectives aims to prepare young people for positive engagement with a rapidly changing world, broadening their outlook through the critical analysis of and reflection on, issues of global significance.

This syllabus is firmly based on skills rather than specific content. Through the study of global issues, learners will explore different and sometimes opposing perspectives and will acquire and develop thinking and reasoning skills as well as research and communication skills. These skills will enable learners to meet the demands of the twenty-first century and to make a successful transition to study in higher education.

Cambridge Pre-U Global Perspectives encourages transformative learning, where learners become critically aware of their own beliefs and assumptions and those of others, developing valid arguments by reflecting on and interpreting, a range of evidence.

Advances in technology have changed our access to information and the way we communicate and work. Increasingly, young people are faced with a multiplicity of competing ideas, information and arguments and they need to be able to think critically to deconstruct arguments, to differentiate between the ways in which people express their perspectives, to assess and evaluate claims and to develop lines of reasoning.

Learners will develop research skills that will enable them to obtain information, evaluate the reliability and usefulness of this information and use the evidence gathered to construct their own arguments and support lines of reasoning.

Through well-defined stages, called the Critical Path, learners will apply a logical approach to decision-making. Learners will be able to analyse the structure and context of arguments, assess the impact and limitations of evidence and make well-reasoned judgements through informed research. Learners will learn to organise and communicate their findings in appropriate formats.

Cambridge Pre-U Global Perspectives prepares learners for further education and for life-long learning across a range of disciplines by helping them to be:

- **confident** in working with information and ideas – their own and those of others
- **responsible** for themselves, responsive to and respectful of others
- **innovative** and equipped for new and future challenges
- **engaged** intellectually and socially, ready to make a difference

All Cambridge Principal Subject syllabuses are linear. A candidate taking a Principal Subject must take all the components together at the end of the course in one examination session. The Short Course Global Perspectives comprises the first three components of the Pre-U Global Perspectives and Independent Research (GPR). A Short Course is provided for those who do not wish to take the subject through to the Pre-U GPR.

Skills and perspectives

Global Perspectives seeks directly to assess generic skills relating to thinking critically and enquiry.

	Detail	Subject Syllabuses	Global Perspectives
Knowledge	Subject-specific	*	
	Cross-curricular		
Understanding	Subject-specific	*	
	Cross-curricular		*
Skills	Subject-specific	*	
	Cross-curricular	*	*
Reflection	Interdisciplinary		*
	Self-reflective		*
	Thinking critically		*

Aims

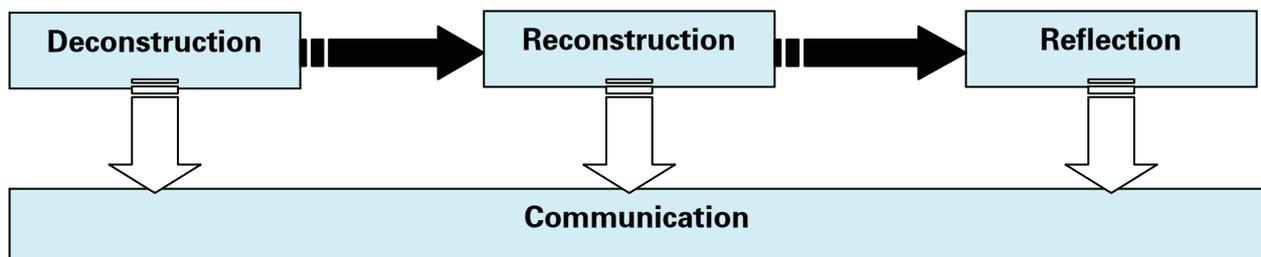

Cambridge Pre-U Global Perspectives will appeal to young people because it enables them to explore issues of global significance and offers them opportunities to acquire, develop and apply skills in critical thinking, research and communication.

Not only does Cambridge Pre-U Global Perspectives equip learners with the skills they need in a rapidly changing intellectual and technical environment, it also prepares and encourages them to engage confidently with issues and ideas of global significance.

To encourage learners to think critically, this syllabus presents an approach to analysing and evaluating arguments and perspectives called the Critical Path.

Candidates will learn how to deconstruct and reconstruct arguments by researching global issues and interrogating evidence. They will reflect on the implications of their research and analysis from a personal perspective and communicate their findings and ideas as reasoned arguments.

The Critical Path

Cambridge Pre-U Global Perspectives aims to develop learners by:

- providing opportunities to acquire disciplined and scholarly research skills
- promoting a critical, questioning approach to information that is often taken for granted
- encouraging self-reflection and an independence of thought
- encouraging an understanding of and engagement with, some of the key global issues that they will face wherever they live and work
- encouraging an awareness and understanding of and respect for, the diversity of perspectives on global issues
- encouraging an interdisciplinary approach to global issues

Articulation and Progression

Cambridge Pre-U Global Perspectives serves as a basis from which a candidate may subsequently embark with confidence on the Independent Research Report, having developed the skills involved in identifying questions, locating and evaluating sources and perspectives, and in setting out a realistic and meaningful research agenda. The Global Perspectives assessment ends at the point where a candidate might be expected to be aware of the issues involved in setting up a research proposal, identifying an appropriate question, and undertaking a literature review or its equivalent. These latter skills are assessed generically in Global Perspectives, and are then assessed in relation to a particular piece of original research, in the Independent Research Report.

The approach taken by Global Perspectives is very different from, but seeks to complement and carry forward the subject-specific approaches elsewhere in the Cambridge Pre-U Diploma. The focus here is on candidates learning how to learn – on providing them with the tools for independent, pro-active, interdisciplinary study.

Prior Knowledge

Global Perspectives builds on the knowledge, understanding and skills typically gained by candidates taking Level 2 qualifications. It is recommended that candidates have attained communication and literacy skills at a level equivalent to IGCSE/GCSE Grade C in English.

The course will equip candidates with a coherent theoretical and practical basis of transferable skills and key knowledge suitable for future lawyers, scientists, medics and academic researchers, whilst providing thought-provoking material that may appeal to those intending to progress to study in higher education and ultimately into a wide range of careers.

Scheme of assessment

Global Perspectives is assessed through three compulsory components.

Component	Task	Duration	Weighting (%)	Type of Assessment
1	Written paper	1 hour 30 minutes	25	Externally assessed
2	Essay	–	30	Externally assessed
3	Presentation	max 15 minutes running time	45	Externally assessed

Components 2 and 3 are submitted in electronic form and marked by Cambridge. Work must be submitted to Cambridge by **31 May** for assessment in the May/June session and **31 October** for assessment in the October/November session.

Guidance on appropriate formats and procedures for the submitted work will be provided. Centres are strongly advised to retain securely either in hard copy or an electronic copy of the complete submission.

Assessment objectives

Throughout the course, candidates will gain knowledge and understanding of the background to a range of global issues and will appreciate the diversity of perspectives within them. This knowledge and understanding will underpin and inform the skills they will acquire, but will **not** be separately assessed.

<p>AO1 Deconstruction Analyse and evaluate conclusions, arguments, reasoning or claims</p>	<ul style="list-style-type: none"> critically compare different perspectives analyse the structure of arguments, reasoning or claims and identify the key components evaluate the implications of the conclusions, arguments, reasoning or claims. analyse and evaluate the strengths and weaknesses of arguments, reasoning or claims evaluate the validity of the conclusions, arguments, reasoning or claims
<p>AO2 Reconstruction Analyse the evidence for conclusions, arguments, reasoning or claims</p>	<ul style="list-style-type: none"> research and analyse evidence to support conclusions, arguments, reasoning or claims evaluate sources used to support conclusions, arguments, reasoning or claims research and analyse alternative perspectives and conclusions against the supporting evidence identify and analyse the context upon which arguments have been based evaluate the reliability and credibility of sources
<p>AO3 Reflection Assess the impact of research on personal perspectives</p>	<ul style="list-style-type: none"> state personal perspectives before carrying out research research alternative perspectives objectively, and with sympathy and empathy evaluate the impact of alternative perspectives and conclusions on personal perspectives identify the need for further research and suggest its likely impact on personal perspectives
<p>AO4 Communication Communicate views, information and research effectively and convincingly</p>	<ul style="list-style-type: none"> select and present relevant information, in a balanced, coherent and well-structured way to a non-specialist audience present complex, global concepts and perspectives effectively, using appropriate media develop and present convincing and well-supported lines of reasoning based on supporting evidence use appropriate technical terms and cited references effectively

Relationship between scheme of assessment and assessment objectives

The relationship between the assessment objectives and the components is shown in the table below.

Assessment Objective	Component			Whole Assessment (raw marks)
	1: Written paper (raw marks)	2: Essay (raw marks)	3: Presentation (raw marks)	
AO1	18	3	6	27
AO2	12	12	6	30
AO3	0	10	16	26
AO4	0	5	12	17
Total	30	30	40	100

Description of components

Component 1: Written paper

The written paper lasts 1 hour and 30 minutes.

Candidates answer compulsory, structured questions based on two or more sources provided with the paper. Questions will require both short and longer responses.

The stimulus material provided with the written paper may express different perspectives on issues of global significance taken from the topics listed in the syllabus.

Candidates will **not** be assessed on their knowledge and understanding of the specific issues represented in the stimulus material. Instead, candidates will be assessed on their thinking and reasoning skills focused mainly on analysing and evaluating arguments, evidence and contexts.

In carrying out a critical and comparative analysis of the stimulus material, candidates will be assessed on their ability to:

- identify and analyse the structure and context of arguments, reasoning and claims
- evaluate the strength of the arguments
- identify the key components of arguments
- identify and evaluate the strengths and weaknesses of arguments
- assess the validity of conclusions or claims
- assess the credibility of sources
- identify and evaluate different perspectives

Nature of assessment

This component is an externally set assessment, marked by Cambridge.

Component 2: Essay

Candidates write an essay on a global issue of their choice from the topics studied during the course.

The essay must be framed as a single question which is clearly focused on a global issue that lends itself to global treatment in 1750 to 2000 words. Candidates should be supported in formulating an appropriate question. See page 16 for the role of the teacher and the level of guidance permitted.

Candidates should focus their individual research on identifying and exploring the context and basis of the arguments from different global perspectives. They should identify different perspectives, understand the arguments, reasoning or claims, upon which these perspectives are based, offer a critical view of them and reach a personal, supported view.

In the essay, candidates will be assessed on their ability to:

- identify and synthesise relevant sources
- assess the credibility of sources used
- analyse at least two conflicting perspectives
- identify and evaluate the evidence that supports the perspectives
- explain how the research has affected their personal perspectives
- show an awareness of the limitations of the arguments considered
- present convincing and well-supported conclusions that answer the question posed
- suggest further relevant research
- communicate effectively and concisely, using technical terms where appropriate

The essay must be written in continuous prose, include a list of sources used and be submitted in an electronic format. Quotations must be fully referenced. The essay must **not** exceed 2000 words and an accurate word-count must be clearly stated on each essay. The word-count excludes the title, references and footnotes. Work beyond the 2000 word maximum will **not** be included in the assessment.

Nature of assessment

Candidates decide on their own essay question for this component, which is externally marked by Cambridge. All materials for Component 2 must be submitted electronically, see the *Handbook for UK Centres*. The deadline for submission is **31 May** (May/June session) or **31 October** (October/November session).

Component 3: Presentation

Candidates produce a presentation based on pre-released source materials provided by Cambridge. The stimulus material consists of a range of sources about at least one global issue seen through a variety of perspectives.

Candidates use the stimulus material to identify and research a topic for their presentation. Candidates must frame a single question that allows them to address contrasting perspectives on an issue derived from the stimulus material. They may research one or more perspectives for themselves. Candidates should be supported in formulating an appropriate question. See page 17 for the role of the teacher and the level of guidance permitted.

Candidates should reflect on the alternative perspectives found in the source materials and from their own research and the focus of the presentation is mainly reflection and communication. In their presentation, candidates establish and present a coherent, personal perspective that shows an understanding of, and empathy with alternative perspectives.

In the presentation, candidates will be assessed on their ability to:

- communicate a coherent argument
- engage with different perspectives, showing any relationships between them
- develop a line of reasoning based on supporting evidence
- express a relevant personal perspective
- evaluate their own personal perspective
- justify their own personal perspective
- present convincing and well-supported conclusions that answer the question posed

The presentation should:

- include relevant stimulus material
- communicate effectively to a non-specialist audience
- cite sources and references clearly and accurately

Candidates are normally expected to deliver their presentation to a live audience and candidates may choose any appropriate format to communicate their research (e.g. poster, PowerPoint, video, weblog, webpages or a mixture of different media). All materials must be submitted electronically. Teachers must ensure that the quality of any recording will permit accurate marking of the work.

Whether presented or not, the submission **must** include a verbatim transcript of the presentation. The running time for the presentation must not exceed 15 minutes. Work beyond the maximum 15 minutes running time will not be included in the assessment.

The pre-released source material will be available to Centres by **1 March** (for the June session) or **1 August** (for the November session) to allow candidates four weeks to complete their presentation. Each Centre may determine the precise timing of the four-week period to fit their own circumstances.

Teachers must ensure that, for each candidate, sufficient and appropriate supporting evidence is submitted to permit accurate marking of the work. Any recorded dialogue or oral presentation must be accompanied by a written transcript and supporting visual materials.

Nature of assessment

Candidates decide on their own presentation question based on the stimulus material provided by Cambridge. The presentation is marked by Cambridge. All materials for Component 3 must be submitted electronically, see the *Handbook for UK Centres*. The deadline for submission is **31 May** (May/June session) or **31 October** (October/November session).

Curriculum content

Skills in research, communication, thinking and reasoning

This syllabus uses global issues to develop the Critical Path approach to interrogating information, exploring different perspectives and communicating personal reflections. These practical skills are transferable across other subjects of study at the same level and provide candidates with valuable thinking and reasoning skills for use in higher education and for a wide range of careers.

The exemplar questions below are designed to support teachers and candidates in developing skills in research, communication, thinking and reasoning.

Element	Exemplar questions
<p>Deconstruction Analyse and evaluate conclusions, arguments, reasoning or claims</p>	<p>What are the different perspectives represented? Critically compare different perspectives.</p> <p>What are the key components of the argument or claim? Differentiate between fact, argument, opinion, rant, speculation, prediction, explanation, hypothesis, account and belief. Identify the conclusions, reasons (premises), assumptions (stated and unstated), assertions (and counter-assertions), and supporting evidence.</p> <p>What are the implications of the conclusions, arguments, reasoning or claims? Suggest the consequences of the conclusions, arguments, reasoning or claims, in a global context.</p> <p>What are the strengths and weaknesses of arguments, reasoning or claims? Evaluate the strengths and weaknesses in the arguments, reasoning or claims. Assess the use of analogy and identify any flaws.</p> <p>Is there a valid conclusion or claim? Identify whether any evidence gives strong or weak support to the conclusion or claim. Suggest other evidence required to substantiate or refute claims or counterclaims.</p>
<p>Reconstruction Critically analyse and interpret the context and evidence of arguments</p>	<p>What evidence is there to support different perspectives? Analyse the evidence base and support for different perspectives.</p> <p>What are the sources used as supporting evidence and how credible are they? Identify, synthesise and evaluate sources of research to support the evidence.</p> <p>Does the evidence lead to a single conclusion? Research and evaluate alternative explanations and perspectives. Make a reasoned and balanced judgment based on evidence.</p> <p>What is the context of the arguments? Explain the global context in which the arguments have been made.</p> <p>How reliable is the conclusion? Evaluate the reliability and credibility of the sources, making it clear how reasoned judgments are made.</p>

Element	Exemplar questions
<p>Reflection Explore the impact of the research on personal perspectives</p>	<p>What were the personal viewpoints before carrying out the research? Reflect on personal perspectives prior to undertaking the research.</p> <p>How do the personal viewpoints relate to the perspectives identified in the research? Evaluate personal viewpoints against alternative perspectives on global issues.</p> <p>What impact has the research had on any prior viewpoints? Evaluate the extent to which personal viewpoints have changed after carrying out the research.</p> <p>Why has the research had an effect on prior views? Justify the reasons why personal perspectives have changed as a result of research.</p> <p>What additional research might be useful? Identify and justify possible further research directions.</p>
<p>Communication Present research findings effectively</p>	<p>What is the most effective way to structure the presentation? Select, and organise relevant information in a logical and coherent way.</p> <p>How can research findings be presented to a non-specialist audience? Explore appropriate media to present complex global perspectives.</p> <p>How can arguments be presented effectively and persuasively? Use well-supported lines of reasoning based on supporting evidence.</p> <p>How can research findings be presented reliably? Use appropriate technical terms and cite references accurately and clearly.</p>

Global topics and perspectives

The global topics provide meaningful and stimulating contexts through which candidates can develop the skills necessary to participate as active, global citizens and to prepare them for independent research and further study. The topics are viewed through different perspectives that help candidates find pathways through the issues and the connections between them.

A suitable study programme can be devised by choosing a range of topics set within a global context and viewed through different perspectives. Candidates should select the topics that engage their interest and explore each chosen topic through the four elements:

- deconstruction
- reconstruction
- reflection
- communication

Candidates research global topics through different themes. Candidates should explore a range of topics from the list below.

Global topic

- Alternatives to oil
- Artificial Intelligence
- Biodiversity and threats to the world's natural heritage
- Endangered cultures
- Ethical foreign policies
- Genetic engineering
- Global climate change
- Globalisation of economic activity
- Globalisation versus new nationalisms
- Impact of the internet
- Incorporating technology into buildings
- Industrial pollution
- Integration and multiculturalism
- International law
- Medical ethics and priorities
- Migration and work
- On-line and interactive communities
- Standard of living/quality of life
- Sustainable futures
- Technology and lifestyles
- The challenge of GM crops
- The economic role of women
- The emergence of a global superpower
- The ethics and economics of food
- The religious-secular divide
- The speed of change in technology and global trade
- Transnational organisations (UN, World Bank, EU, NATO)
- Urbanisation and the countryside

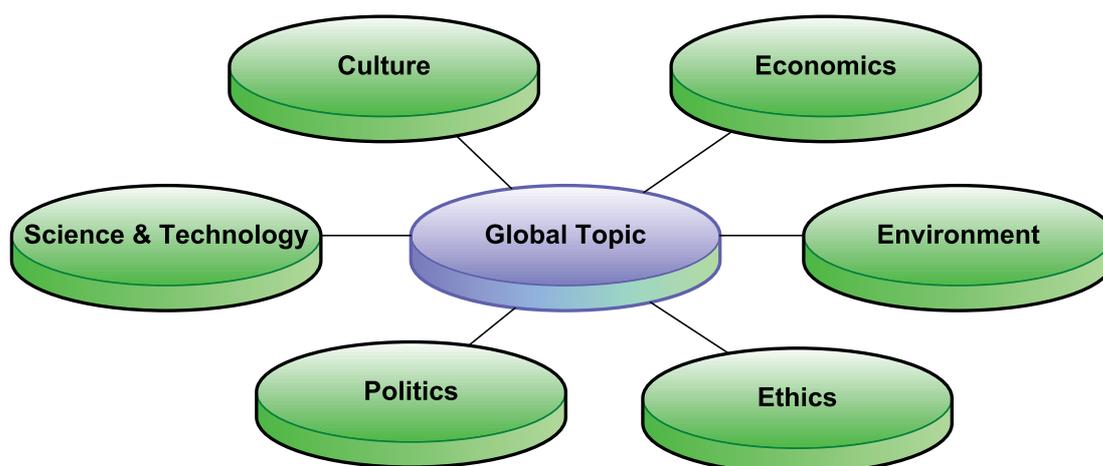

By studying at least **four** topics, candidates will develop the Critical Path to interrogating information and acquire and develop a range of skills, including thinking critically, reasoning and communication.

Candidates research global topics through as many different themes as is relevant.

Theme

Culture
Economics
Environment

Ethics
Politics
Science and Technology

Global issues are complex, multi-faceted and multi-level challenges and through the structured exploration of global topics, candidates research alternative perspectives from different themes. Candidates will be guided towards development of research, communication, thinking and reasoning.

Grade descriptors

The following grade descriptors indicate the level of attainment characteristic of the middle of the given grade. They give a general indication of the required standard at each specified grade. The descriptors should be interpreted in relation to the curriculum content in the syllabus, they are not designed to define that content.

The grade awarded will depend in practice upon the extent to which the candidate has met the assessment objectives overall. Shortcomings in some aspects of the assessment may be balanced by better performance in others.

Distinction (D2)

Candidates characteristically:

- apply the language of reasoning in an appropriate, confident and precise way to the context
- demonstrate a secure understanding of the overall structure of subtle or complex argument, identifying key components accurately and, for example, distinguishing intermediate from main conclusion and recognising counter-argument where present
- demonstrate the ability to make perceptive critical evaluation of argument in terms of their strengths, weaknesses, flaws, implicit assumptions, use of evidence, etc.
- where appropriate, interpret and clarify key expressions and ideas with precision
- critically assess the credibility of sources of evidence and the impact of those sources on the issue
- recognise contrasting points of view and identify the reasoning underpinning those points of view, recognising and evaluating clearly the arguments on each side
- construct and communicate their own cogent complex arguments synthesising concepts and ideas fluently and accurately in a logical manner
- provide persuasive reasoned responses to challenges, questioning and counter-argument
- show clear evidence of perceptive/original reflection and/or reasoned opinion;
- respond with sensitivity and respect to counter-argument
- reflect on the development of their own viewpoint showing balance and self-awareness.

Merit (M2)

Candidates characteristically:

- apply the vocabulary of reasoning to the context with understanding of its correct usage
- demonstrate understanding of the overall structure of the argument, identifying most key components accurately
- demonstrate the ability to make some critical evaluation of the argument in terms of obvious strengths, weaknesses and flaws
- interpret and clarify expressions generally with accuracy
- assess the credibility of sources of evidence and their impact with some relevance to the issue
- recognise at least one other contrasting point of view and the gist of the reasoning underpinning that point of view, but evaluation is incomplete or imprecise
- construct and communicate their own arguments showing some ability to synthesise concepts and ideas mainly accurately and logically, but argument may lack balance
- provide sound information in response to challenges, questioning and counter-argument, but may lack perception

- show some evidence of reflection and/or their own reasoned opinion
- respond with respect to counter-argument
- show some capacity to reflect on their own viewpoint with self-awareness

Pass (P2)

Candidates characteristically:

- apply the vocabulary of reasoning with some instances of correct usage
- demonstrate understanding of the gist of the argument and/or some of the reasons, identifying one or more key components correctly
- demonstrate some evidence of critical evaluation of argument, for example identifying an obvious weakness or flaw
- make some comments about expressions and ideas, but these may be simplistic or superficial
- make superficial comments about the sources of evidence
- recognise the gist of contrasting points of view and/or some of the reasoning, but comments may be superficial
- make some attempt to construct an argument which may include relevant ideas and information, but lack depth or coherence, or include digression
- provide a response to challenges, questioning and counter-argument, but may lack relevance
- develop their own presentation using collaborative working methods which are effective at times
- show evidence of reflection and/or their own reasoned opinion but this may be limited
- respond to counter-argument, but response may show lack of thought
- show some capacity to reflect on their own viewpoint but conclusions may be superficial

Appendix 1: The teacher's role and level of guidance permitted

Component 1: Written paper

1 hour 30 minutes

The written paper consists of compulsory question based on sources provided with the paper.

Candidates will be required to analyse and evaluate arguments, interrogate evidence and compare perspectives centred on global issues.

Although this is a skills-based paper that does not require candidates to have been taught any specific content, teachers should consider and explore the skills candidates need for this paper during class work. Teachers should prepare candidates for the types of questions they are likely to meet in the paper by using specimen and past papers and mark schemes which can be obtained from the website <http://www.cie.org.uk/>

Component 2: Essay

Candidates write an essay on a global issue of their choice from the topics studied during the course.

A class may work together to carry out background research on a common theme, but each candidate must devise their own question. Each candidate must submit a different question.

Candidates should be given sufficient time to plan and prepare their research. During this preparation, teachers should support each candidate in:

- understanding the nature of the task
- identifying a suitable topic to research
- formulating an appropriate question
- developing a suitable approach to the research
- developing organisational skills
- citing and referencing their sources
- focussing on reconstruction and reflection
- writing effectively and concisely to stay between 1750 and 2000 words
- including an accurate word count

Questions for essay titles may be submitted to Cambridge for approval using the Outline Proposal Form. Forms should be received no later than **31 October** in the May/June session and no later than **31 March** for the October/November session. Centres should allow up to four weeks for the return of the form.

The essay must be the candidate's own work. Once candidates embark on researching and writing the essay, they must only seek assistance from their teacher, **but** there must be minimum intervention by the teacher. Candidates must **not** cut and paste large amounts of text from sources without showing evidence of reworking.

Teachers must **not**:

- offer or provide detailed subject guidance to candidates
- undertake any research on behalf of candidates
- prepare or write any subject-specific notes or drafts for candidates
- correct any part of a candidate's essay or notes used for the essay
- suggest amendments to, or comment on, any part of the essay

Candidates must be taught the meaning and significance of plagiarism.

Candidates will be required to sign a declaration indicating that the essay is their own work. The teacher responsible will be required to countersign this declaration, verifying that these regulations have been observed. This declaration must accompany the essay on submission. The deadline for submission is **31 May** (May/June session) or **31 October** (October/November session).

Component 3: Presentation

Candidates produce a presentation based on pre-released stimulus materials provided by Cambridge. The stimulus material consists of a range of sources about a global issue seen through a variety of perspectives.

A class may work together to carry out background research on a common theme, but each candidate must devise their own question which has its own focus.

Candidates should be given sufficient time to interrogate and discuss the pre-release material, and to plan and prepare their research. During this preparation, teachers should support each candidate in:

- understanding the nature of the task
- discussing the issues, problems and research opportunities based on the pre-release material
- formulating an appropriate question
- developing a suitable approach to the research
- developing organisational skills
- citing and referencing their sources
- focussing on reflection and communication
- developing an empathetic approach to alternative perspectives

The presentation and associated materials must be the candidate's own work. Once candidates embark on researching and producing the presentation, they must only seek assistance from their teacher, **but** there must be minimum intervention by the teacher. Candidates must **not** cut and paste large amounts of text from sources without showing evidence of reworking.

Teachers must **not**:

- offer or provide detailed subject guidance to candidates
- undertake any research on behalf of candidates
- prepare or write any subject-specific notes or drafts for candidates
- correct any part of a candidate's notes used for the presentation
- prepare any part of the presentation
- produce any part of the transcript to accompany the oral commentary
- suggest amendments to, or comment on, any part of the presentation

Candidates must be taught the meaning and significance of plagiarism.

Candidates will be required to sign a declaration indicating that the presentation is their own work. The teacher responsible will be required to countersign this declaration, verifying that these regulations have been observed. This declaration must accompany the presentation on submission. The deadline for submission is **31 May** (May/June session) or **31 October** (October/November session).

Appendix 2: Key terms

A **global issue** is one that goes beyond the local or national context and would be experienced by people wherever in the world they live or work. For example, migration is an issue of importance around the world, and to examine it in its global context from different perspectives would require a question such as 'Is immigration control ever justified?' rather than 'Should immigration policy in Germany be changed?' The latter is based on one country whereas the former has the potential to be global.

A **perspective** is a viewpoint or standpoint, sometimes embedded in or strongly informed by a world view. Underlying any perspective are concepts, principles, uses of language and attitudes which are often implicit and may be emotional and subconscious as well as rational and conscious. Perspectives tend to be coloured by the circumstances in which people live, the language they use and the ideas that surround them.

Different perspectives should be genuinely **contrasting** (i.e. they should come from a different world-view rather than represent subtly different takes on an issue). Although there is no absolute requirement that alternative perspectives be rooted in different geographical areas, genuinely different **global perspectives** are likely to be informed by different cultural, geographical and political environments. Looking at materials from different countries and/or cultures would therefore be a good way of accessing different global perspectives.

It is also possible for two contrasting perspectives (rooted in different world views) to be exemplified by particular 'local' contexts (for example the views of a local Muslim community versus those of a secular background). Teachers should note however that while local contexts can be used as exemplification, this exemplification should be used to consider implications more globally. Candidates need to **empathise** with viewpoints that differ from their own while not necessarily accepting the viewpoints of others.

Arguments and evidence often express a perspective and can be used to support a perspective. There needs to be some form of **evidence base** underlying and/or supporting all perspectives. This evidence base is likely to consist of a variety of arguments, sources and evidence which may or may not be of good quality. Candidates need to sift and select evidence. **Evidence** is likely to come in two forms: primary evidence such as historical texts or results of scientific evidence, and secondary evidence such as the arguments and opinions of historians or scientists. The assessment objectives put weight on the second of these. Candidates should be aware of the strengths and potential weaknesses of all types of evidence. Primary is not necessarily better than secondary. When assessing the credibility of particular sources candidates should bear in mind that this is a way of assessing the evidence presented for a perspective and is not an end in itself.

Candidates research and **analyse** different perspectives based on issues of global significance. They examine the structure of arguments, considering the strengths and weaknesses. They will use research skills to search, collect and **synthesise** their findings into well-supported lines of reasoning, drawing together evidence from a variety of sources into a balanced argument or conclusion. Candidates **evaluate** evidence, arguments, reasoning, conclusions or claims in the context of different perspectives, including their own. They make reasoned and value judgements based on evidence and personal viewpoints prior to and after carrying out their research. Candidates consider the validity of evidence, reasoning, conclusions or claims.

The **Critical Path** is an approach to thinking critically. It consists of **deconstruction, reconstruction** and **personal reflection**. **Deconstruction** is the analysis of an argument or reasoning; **reconstruction** is the analysis of the context and evidence of an argument, and **personal reflection** is the exploration of the impact of research on personal viewpoints.

Appendix 3: Additional information

Guided learning hours

It is anticipated that Global Perspectives will require approximately 180 hours of guided learning. This is a notional measure of the substance of the qualification. It includes an estimate of the time that might be allocated to direct teaching or instruction, together with other structured learning time such as directed assignments or supported individual study and practice. It excludes learner-initiated private study.

Certification title

This qualification is shown on a certificate as:

- Cambridge International Level 3 Pre-U Certificate in **Global Perspectives (Short Course)**

The qualification is accredited at Level 3 of the UK National Qualifications Framework and provides a solid grounding for candidates to pursue a variety of progression pathways.

Entries

For entry information for each session please refer to the *UK E3 Booklet*.

Global Perspectives and Independent Research (GPR)

Candidates wishing to continue on to the Pre-U Certificate in Global Perspectives and Independent Research should complete the three Global Perspective components and the Independent Research Report, and enter for the syllabus code 9777.

Classification code for UK Centres

In the UK, every syllabus is assigned to a national classification code that indicates the subject area to which it belongs. UK Centres should be aware that candidates who enter for more than one qualification with the same classification code will have only one grade (the highest) counted for the purpose of the School and College Performance Tables.

The classification code for this syllabus is **EXTP**.

Language

This syllabus and the associated assessment materials are available in English only.

Procedures and regulations

This syllabus complies with the *Cambridge Code of Practice* and *The Statutory Regulation of External Qualifications 2004*.

Further information about the administration of Cambridge Pre-U qualifications can be found in the *Cambridge Handbook for UK Centres* available from Cambridge Publications or by contacting info@cie.org.uk

Spiritual, moral, ethical, social, legislative, economic and cultural issues

- This syllabus provides opportunities for candidates to develop their understanding of spiritual, moral, ethical, social, legislative, economic and cultural issues throughout the course.
- Topics considered under the Ethics theme offer opportunities for understanding of spiritual, moral and ethical issues to be developed.
- Topics considered under the Economics theme offer opportunities for understanding of economic issues to be developed.
- Topics considered under the Politics and Culture theme offer opportunities for understanding of social, legislative, economic and cultural issues to be developed.

Sustainable development, environmental education, health and safety considerations, European dimension and international agreements

- This syllabus provides opportunities to consider aspects of environmental education within the Economics, Environment and Technology themes.
- There are opportunities in this syllabus to investigate local, national and international aspects throughout the course. Investigation of international dimensions is an integral part of the course.

Avoidance of bias

Cambridge has taken great care in the preparation of this syllabus and assessment materials to avoid bias of any kind.

Key Skills

This syllabus provides opportunities for the development of evidence for the Key Skills of: *Communication, Application of Number, Information Technology, Working with Others, Improving Own Learning and Performance* and *Problem Solving* at Levels 2 and/or 3. However, the extent to which this evidence fulfils the Key Skills criteria at these levels will be totally dependent on the style of teaching and learning adopted for each section.

The Key Skills awarding bodies and the regulatory authorities have produced a suite of example portfolios that will help to give candidates and practitioners a clear understanding of the requirements for the Key Skills portfolio. These are available on the QCDA Key Skills website (www.qcda.org.uk/keyskills). Full details of the requirements for certification can be obtained from the awarding bodies that are approved to offer Key Skills. For further information about Key Skills assessment, please see the document *The Key Skills qualifications standards and guidance* published by the Qualifications and Curriculum Authority 2004 (ISBN 1 85838 548 2).

The following table indicates where opportunities may exist for at least some coverage of the various Key Skills criteria at Levels 2 and/or 3 for each section.

Component	Communication	Application of Number	IT	Working with Others	Improving own Learning and Performance	Problem Solving
