

Materials provided as part of the program for each subject (unless otherwise specified)

The Cambridge program includes significant resources for teachers, **free of charge**, through the Teacher Support website.

Syllabus

A comprehensive single document presenting clear expectations on subject content and the skills and knowledge the student will acquire during the program.

Scheme of Work

This sets out an appropriate order for the teaching of the content to give teachers a firm base to follow or adapt.

Specimen Question Papers and Mark Schemes

These typical examination papers exemplify the question types and standards that are typically presented.

Past Question Papers and Mark Schemes

These actual examination papers and the marking rubrics can be used to provide realistic practice for students.

Examiner Reports

Reports written by the examiners on the work of candidates with comments on how students answered key questions.

Discussion forum

Online support where teachers can exchange views, upload and share resources, ask questions and engage with a community of teachers with similar interests.

Additional materials may be purchased as indicated in the list below.

These resources are optional. A wide range is frequently available so teachers can select the most appropriate support.

Materials are all reusable (student Workbooks are designed for students to write in and may be reused if students write on separate paper).

Material produced by CIE:

- *Coursework / Speaking Test Training Handbooks:* used by teachers to obtain accreditation for assessing coursework or students' speaking skills at Cambridge IGCSE level. Schools only need to buy one copy of the handbook, which can then be used by any number of teachers. There is an additional charge per teacher sending CIE completed training materials. Available for the following IGCSE level subjects: Art & Design, Computer Studies, Drama, English First and Second Language, Literature in English, Foreign Languages: French, Spanish, Science: Biology, Chemistry, Physics, Coordinated, Spanish First and Foreign Language, History (World), Mathematics, and Music. **This is not compulsory for all teachers but at least one teacher in each school offering a subject including coursework must complete this Distance Training.**
- *Distance Training Packs:* used by teachers to obtain accreditation for assessing coursework or students' speaking skills at Cambridge IGCSE level (being replaced by Coursework / Speaking Test Training Handbooks). Pack includes a distance training manual, syllabus, (and tapes/CDs where necessary), standards booklet and mark sheets. Available for Mandarin Chinese Foreign Language. Schools only need to buy one copy of the Pack, which can then be used by any number of teachers. There is an additional charge per teacher sending CIE completed training materials **This is not compulsory for all teachers but at least one teacher in each school offering a subject including coursework must complete this Distance Training.**
- *Standards Support Resources CD-ROMs:* help you understand the standards required for success in examination (inc electronic copies of past question papers, mark schemes, examiner reports and examples of graded student answers with comments from examiner – these examples are not available on the Teacher Support Website. 1 CD includes standards for all the following subjects: English First Language, English as a Second Language, Literature in English, Mathematics, Additional Mathematics, Biology, Chemistry, Physics, Coordinated Science, History (World), Economics, Geography.
- *Standards Booklets:* contain hard copy extracts from candidates' work, with indication of the mark achieved and sometimes a brief comment from the examiner. These are not available on the Teacher Support Website.
- *The International Practical Science Guide:* for use with IGCSE or AS / AL Biology, Chemistry, Physics, Coordinated Science. Purpose of this guide is to encourage the increased use of practical work from primary through to the end of secondary schooling. Written specifically for schools with limited science resources. It gives advice on preparing and equipping a basic laboratory cheaply, safely and effectively. The book provides excellent and easy-to-follow guidance for teachers and laboratory technicians on setting up and carrying out practical work. It shows teachers how practical work does not have to be restricted by lack of equipment, lack of expertise or other factors.

Material produced by publishers:

- *'Endorsed'*: CIE endorses a range of materials from different publishers as being closely matched to a specific syllabus. All endorsed materials have been assessed through a stringent review process against a defined set of criteria such as close coverage of the syllabus covered and suitability of the level of English used. ***Endorsed materials are in italics in the listing for each subject.***
- *'Recommended'*: CIE recommends published material through a review process that confirms that this material is a valuable resource for a student or teacher to use as supplementary material. It is not as closely matched to the course as endorsed material.

For many subjects, there is a **choice** of endorsed and/or recommended text books. If a teacher requires advice about which to choose, Cambridge will be happy to provide guidance.

- **Textbooks / Coursebooks**: generic terms for books published for studying a particular syllabus.
- **Teachers' Books / Teachers' Resource Books / Teachers' Guides**: textbooks that provide teacher guidance on how to teach the subject to the student. These often also contain suggested classroom activities, teaching tips, lesson plans, etc.
- **Teachers' Kits / Teachers' Packs**: similar to the above but usually consisting of various elements, e.g. a teacher's book and teacher's CD-ROM
- **Students' Books**: Textbooks / Coursebooks written for the student to use in the classroom under the teacher's guidance (can be used for homework and self-study too). Usually called by the name of the subject covered, e.g. Cambridge IGCSE Biology
- **Workbooks**: additional material for students, usually published in black and white or 2 colours, containing exercises and activities giving the student practice in the skills required in a particular subject. **These may be reused only if students do not write their work in them.**

The cost of resources supplied by CIE is fixed for the duration of the contract. The price of resources supplied by publishers is the current list price at www.cie-source.com, given for information, and is subject to normal variation.

* It is recommended that this book be read **prior** to using the Coursework / Speaking Test Training Handbook

+supports a one-year, theme-based intermediate English course. It is ideal for students who are not yet ready to start a demanding, exam-focused course such as (IGCSE) English as a Second Language (E2L).

++ for students who are taking (IGCSE) English as a Second Language (E2L) course/ examination, and follows on from Coursebook 1. However, Coursebook 2 can be used independently of the first level, purely as an examination-preparation course.

Literature in English (First teaching September 2011, first examination in May/June 2013)

This syllabus is under revision specifically for SCOBES schools and will provide a range of authors' work suited to US High Schools. Materials currently available on the CIE website provide illustration of how the syllabus works. Further information will be available as the development proceeds.

Additional materials available for the current international syllabus.

resource	available from	price	Reference
